LED Filament Globes
40W Incandescent Equivalent

Features

- Sized to the incandescent standard, these bulbs will fit old or new fixtures seamlessly.
- True 360° light output. Filament technology successfully duplicates the “sparkle” of traditional lighting, particularly when diffused by crystal.
- Highest quality “sapphire” substrate “chip on glass” LED filament technology for clear and accurate color, bulb longevity, and cool operating temperature.
- Available in warm white and new antique white (even warmer). Color is maintained, whether at 100% or fully dimmed. Full-range dimming, from 100% down to a glow. Smooth, even dimming.
- IC controller for excellent compatibility with most dimmers and systems.
- Super-efficient 110 lumens per watt – 90% less energy consumption than traditional lighting
- Operating temperature: -13°F to 122°F
- 3 year warranty under normal conditions (see replacement policy. Glass lens not covered).
- UL listed
- IP65 rated for damp locations and “fully” enclosed fixtures.
- Environmentally friendly with no mercury or hazardous materials, 100% recyclable.
